

What is Remind101?

Remind101 is a service that provides a safe way for teachers to text message or email students and parents. Using Remind101, teachers can engage their students and parents more effectively without needing to know their phone number and without having to give their phone number out.

How does Remind101 work?

Great question! First, a teacher adds his/her class, which generates a unique code. The teacher then shares that code with students or parents. At that point, any student or parent who sends a text message with the code will be "subscribed" to the teacher's class. Any time a teacher sends a message from Remind101, all the students or parents subscribed will receive it. Here's a fun video a teacher recorded walking through the service:

How do students or parents sign up?

Students and parents sign up for notifications by sending a text message with a teacher's class code (e.g. text @code to 555-555-5555). They may also sign up by sending an email to the teacher's code (e.g. code@remind101.com). The medium they sign up with determines how they will receive notifications. So if a student signs up from her phone, she will receive text messages. Likewise, a parent who emails in will receive messages via email.

How much does Remind101 cost?

Remind101 is in beta and currently free. Our goal is to keep it free for teachers. If we decide to charge for premium services, we will give current users a reasonable forewarning so they may prepare.
